C5500

FUJI XEROX 

ApeosPort-III C7600 / C6500 / C5500 Digital Colour Multifunction Device

Production performance with colour
impact for your office

ApeosPort-III C7600 / C6500 / C5500 Multifunction Devices

Print. Copy. Scan. Fax. The ApeosPort-III C7600 / C6500 / C5500 multifunction devices are equipped to handle the output volumes needed for document intensive office environments. Add to that unrivaled, high impact colour, and you have the versatility to give your business a clear, competitive edge.

Fuji Xerox's Apeos iiX (Apeos Internet Integration based on XML and SOAP) is a software platform inside the ApeosPort-III C7600 / C6500 / C5500 multifunction devices that can be customised to meet your specific business requirements. By connecting several business critical applications, you can increase staff productivity, as well as improve business and environmental efficiencies.

Features at a glance

- Print, copy, scan and optional faxing
- Print up to 75 ppm black and white, 60 ppm colour
- True 2,400 x 2,400 dpi print resolution
- Intuitive, easy-to-use colour user interface
- Security features for demanding office environments
- High impact colour with built-in control and accounting features

ApeosPort-III C7600 with optional High Capacity Feeder and C-Finisher with Booklet Maker

Versatility from start to finish

Add features and options to the ApeosPort-III C7600 / C6500 / C5500 to make it the perfect fit for your office.

Large paper capacity. For high-volume workgroups, the 3,260 sheet paper capacity can be boosted to 5,260 sheets with the optional High Capacity Feeder. ApeosPort-III C7600 / C6500 / C5500 is available with the following four paper trays as standard:

- Two fully adjustable paper trays (A5 to A3)
- Two high capacity paper trays (A4 only)

Flexible document handling.

The single pass DADF option allows both sides of a document (black and white only) to be scanned simultaneously at up to an incredible 100 pages per minute for exceptional productivity.

Professional finishing options.

Create professional presentations and attractive manuals or proposals. This range of optional finishers gives you efficient, finish-on-demand versatility. These high performance finishers feature stapling, hole punching, saddle stitching and many other finishing tasks.

Colour user interface

can be customised to feature only the most frequently used features. For easier document viewing, colour previews of scanned documents can be shown on the display as thumbnail images¹.

¹ Optional.

- 1 Fully customisable colour touch screen layout
- 2 Convenient access to advanced functions such as copying, network scanning, faxing and email
- 3 Integration with web-based applications
- 4 Assign frequently-used features to the custom hard buttons

From paper to digital to anywhere

The ApeosPort-III C7600 / C6500 / C5500 devices turn your paper documents into intelligent digital files and opens the door to more possibilities – more ways to organise, store and share your information than ever before.

Cutting-edge scanning functionality. Increase efficiency with Scan to Email for quick document distribution to multiple email addresses, Scan to Folder to store on the device and Scan to Home to store on a personal directory. Plus Scan to Network Folder or FTP.

Increase efficiency
with Scan to Email
for quick document
distribution to
multiple email
addresses

Scan to Searchable PDF format for easy archiving, organising, searching and sharing. Creating a text searchable PDF file is as easy as choosing a file format when programming a scan job – it can even be designated the default format¹.

¹ Optional Searchable PDF Kit is required.

Store frequently printed documents. Increase employee efficiency with robust scanning features that store frequently used forms and documents in the device's hard drive for subsequent reprinting.

Scan to Home. As easy as copying, documents can be scanned directly to a pre-designated folder on a registered PC for immediate use or archived for later retrieval².

² External authentication is required.

Automatic file distribution. This feature lets you route documents to multiple destinations – email, folders, fax or print – from a single scan, using a pre-set workflow.

Light directory access protocol (LDAP) takes the time and effort out of scanning a document to email by providing users with search access to the email address of an intended recipient from the address book on the server.

Streamline network traffic and create greater operational efficiency by sending information via a URL link. Send a URL link that brings you directly to a file's location rather than the document itself.

Easily scan single files into one merged document or split one large document into single files.

Performance to increase productivity

Why crowd the office with multiple devices when one can meet all your needs? The ApeosPort-III C7600 / C6500 / C5500 multifunction devices have the features you use everyday and the power to be true multitaskers.

Super-fast copy and print speeds of up to 75 ppm in black and white and 60 ppm in colour, for a quick turnaround.

Nothing gets noticed like colour 2,400 x 2,400 dpi output print resolution gives your documents optimum clarity and impact.

Automatic colour sensing technology. Using built-in image sensing technology, the ApeosPort-III C7600 / C6500 / C5500 automatically recognises when colour is used and will capture this information in the device meters.

Compliant to Gigabit Ethernet environment. The ApeosPort controller supports optional Gigabit Ethernet connections.

USB direct printing saves time for users by printing PDF and TIFF files directly from a USB flash memory drive or JPEG files from a camera media without having to boot up a PC. A perfect solution when the need to print is urgent¹.

¹ When attaching a Media Printer Kit (Optional). JPEG files retrieved directly from the DCIM folder can be printed.

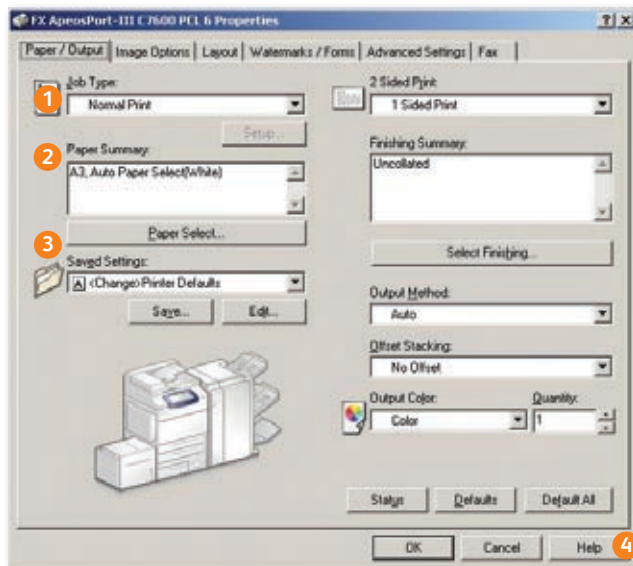

Breakthrough print driver platform that can significantly reduce costs and increase the efficiencies of printer management and support. A Fuji Xerox Multi-model Printer Driver 2 provides users and network administrators with a single driver interface that communicates with multiple Fuji Xerox devices².

² Available for specific models only.

WHQL certified PCL (standard) and PostScript (optional) print drivers provide a consistent, easy-to-use interface for end-users that can greatly simplify your printing operations.

Save time by storing the settings of frequently printed documents as favourites in your print driver. Settings include paper sizes, covers, duplexing, finishing and more.

Advanced copy and print features. Plenty of support for specialised print applications, such as Annotation, Delayed Print and Watermark right from the print driver.

- 1 Drop down menu for secure print, fax, save to mailbox and more
- 2 Paper selection summary window
- 3 Favourite print settings
- 4 Help function for feature descriptions and driver assistance

Extensive fax capabilities

Network Server Fax, Internet Fax enablement (to avoid long distance charges) and Walk-up Fax eliminate the need for a dedicated fax machine.

Electronic fax. If there is a concern about faxes getting lost in piles of other documents, this feature eliminates paper wastage and provides peace of mind. It will route incoming faxes to a nominated email address, folder or network connected PC for retrieval and further distribution on demand.

Capture and store undelivered faxes sent directly from the device. The fax number can be edited at the user interface and re-sent if required, without rescanning the document(s).

Block unwanted (junk) fax numbers. This allows you to block specified fax numbers, so it does not print faxes received from those numbers in the future.

Restrict users from sending faxes to numbers not listed in your address book. This security feature will help protect the leakage of confidential information and reduce costs by preventing users from using the fax function for non-business related purposes.

Improve your business communications with the cost-effective G3 fax option

Cutting-edge Internet and security standards

The ApeosPort-III C7600 / C6500 / C5500 multifunction devices incorporate some of the strongest security features in the industry, helping you to ensure that your document production workflow is well protected.

Latest in Internet standards and protocols

ApeosPort-III C7600 / C6500 / C5500 multifunction devices

support the new IPv6 standard, which opens up additional IP addressing opportunities across the Internet and inside enterprise firewalls. IPv6 provides additional network security, better network routing and configuration, and improved support for high volume printing and larger print jobs.

IPSec. IPv6 support includes full enablement of the IPSec standard, one of the strongest and most versatile security standards.

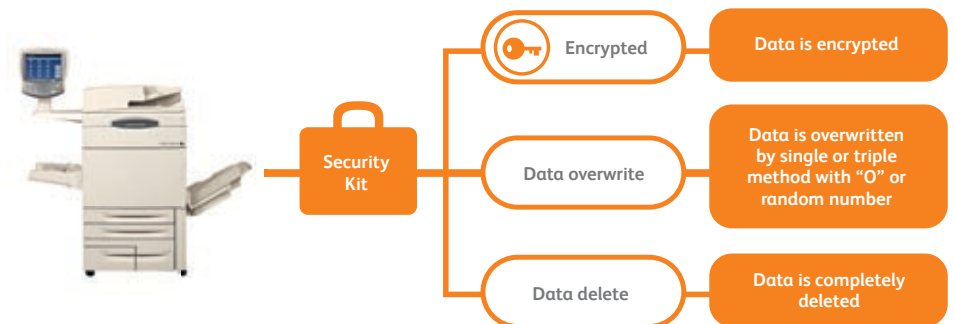

802.1x Port Based Network

Access Control ensures that devices that are connected to the network have the proper authorisation.

Secure Print helps prevent unauthorised viewers from seeing documents by holding jobs in the print queue until the user is authenticated, eliminating paper wastage and securing confidential information.

Data security kit available as an option with ApeosPort devices provides administrators with three security options:

Unauthorised reproduction of sensitive material can help prevent with the optional Secure Watermark Kit. Documents featuring this secure watermark cannot be copied, scanned or faxed using similarly equipped devices.

Maximum manageability

Flexible, scalable tools and a high degree of control ensure that your ApeosPort devices are easy to deploy and maintain on your corporate network.

Remote fleet configuration. CentreWare Internet Services allows for simplified device configuration and administration, and lets you easily clone configurations to other similar devices on the network.

Manage colour printing to minimise costs. Control costs by nominating when colour could be used and by whom. This ensures that colour is available to those individuals who truly leverage its power - such as the sales teams and marketing department.

Manage and track device usage using Xerox Standard Accounting. Device usage reports can be obtained and presented as a CSV file for greater cost control of printing, copying, scanning and faxing.

ApeosWare Authentication Agent. An optional device management application software which makes it easy for administrators to control device usage; copy, print, fax, scan and colour / black and white per user or group.

Prevent losing your settings after a fatal system failure with Setting Restore Tool. This tool will backup the settings stored on your hard drive and easily restore these settings¹.

¹ Settings can only be restored after changing the hard disk of the device.

1 Configure auditor

2 Upload email / fax address books as CSV files

3 Monitor paper tray / consumables status

4 Monitor job queues

5 Submit driverless print jobs

Fuji Xerox and environmental sustainability

Fuji Xerox technology and services are designed and managed to improve sustainability performance for its customers. Our equipment features environmentally responsible design and energy efficient enhancements.

Our document software and digital technologies help reduce paper wastage and our services enable clients to improve the efficiency of document intensive business processes and optimise their equipment infrastructure to save costs and cut carbon emissions.

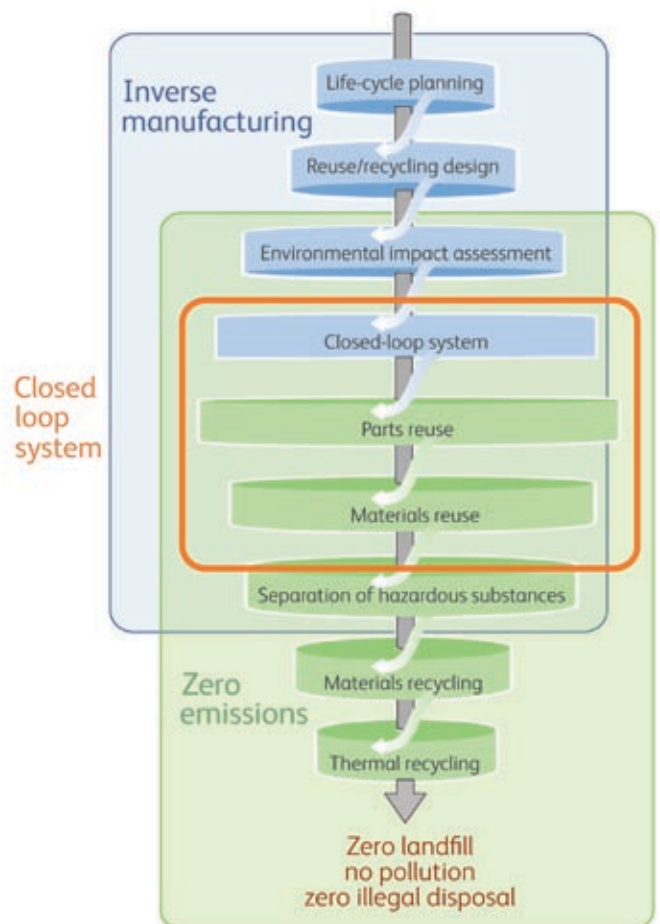

Design for the environment. Every piece of Fuji Xerox equipment is designed with the environment in mind and our achievements include:

- Eliminating the need to use hazardous material such as lead-based solder;
- Enabling low energy consumption during use of the machine;
- Utilising innovative and energy efficient toner;
- Minimising the use of new resources; and
- Facilitating the remanufacture or recycling of used machines and parts at end of life

A leader in product stewardship. Fuji Xerox was first in the industry with products made from reused components and takes responsibility for all end-of-life products. We achieve over 99 % resource recovery from the products returned to us at end of life.

Integrated Recycling System is based on three concepts:

- **Closed loop system** - we ensure used products are thoroughly and effectively used as resources;
- **Inverse manufacturing** - products are designed to minimise environmental impacts and maximise parts reuse; and
- **Zero emissions** - parts that cannot be reused are separated and recycled, and used as new materials again

Extending your capabilities with Apeos Solutions

Apeos iiX (Apeos Internet Integration based on XML and SOAP) extends ApeosPort's capabilities beyond those of a regular multifunction device (MFD). Apeos iiX allows users to connect to various web applications and provides a suite of Software Development Kits for the seamless customisation and integration of all business applications with ApeosPort... making it a truly intelligent portal.

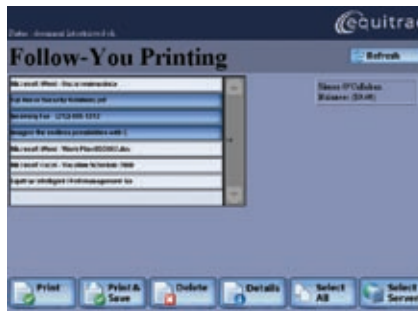

Leveraging Fuji Xerox consultancy expertise for greater ROI. To maximise your ApeosPort investment, leverage on Fuji Xerox's comprehensive consultancy expertise to customise the web services available through the Web Browser on your ApeosPort.

Depending on the complexity of your environment and business needs, the Fuji Xerox Business Alliance and Consulting Services (BACS) group provides document consulting, system design, development and project management services to assist you with your integration or customisation requirements.

Our customisation team can re-design your ApeosPort's web browser to display the same "look-and-feel" as your business application. Enjoy true customisation with the flexibility to add company logo, change colours and integrate unique workflows.

Effectively manage printing costs in your office. By seamlessly integrating with Fuji Xerox multifunction devices (MFD's), Equitrac Office® print management solution allows you to track, analyse and allocate costs of printouts sent to a networked printer, copier or MFD.

The Follow-You Printing with Secure Document release increases mobility and productivity by allowing your staff to output documents at any networked printer within your office. It enables a secure access by entering a user ID or swiping a card before getting their documents. This means that users can avoid being on guard while waiting for their printouts - letting them make better use of their billable time.

An extensive reporting capability enables traceability of costs within workgroups. It also provides information on which devices are heavily used and breaks down often so you can make informed decisions on deploying your office equipment.

Document security is priority. Fuji Xerox introduces a solution that ensures top security for all your electronic and paper documents. The new ApeosWare Image Log Service (AWILS) Document Security Solution lets you monitor and track any document once it is copied, printed, faxed or scanned.

All documents that are copied, printed, faxed or scanned, are automatically saved as images by ApeosPort. Next, these captured images are seamlessly transferred to a core server with "OCR" technology, and are indexed and stored according to their job information. Should a leak occur, you can trace and locate the disclosed documents as well as the source of the leak including who, where, when, which and how, by performing keywords or content searches of the stored images on the core server. Investigative work that was once tedious and time-consuming now becomes swift and effortless!

Specifications of ApeosPort-III C7600 / C6500 / C5500 Series

Copy Function

	ApeosPort-III C7600	ApeosPort-III C6500	ApeosPort-III C5500
Type	Console type		
Memory	1.024 MB		
HDD	160 GB ¹		
Scanning Resolution	600 x 600 dpi		
Warm-up Time	95 sec or less (at room temperature 20°C)		
Original Paper Size	Max: A3 for both sheet and book originals		
Output Paper Size	Max: A3 (11 x 17") [For Bypass Tray: 13 x 19" (330 x 483 mm), 12.6 x 19.2" (320 x 488 mm)] Min: A5 [For Bypass Tray: Postcard (100 x 148 mm)]

Booklet Finishing	Capacity: Booklet: 15 sheets, Bi-Fold: 5 sheets Paper Size: Max: 13 x 18", Min: A4, Letter (8.5 x 11") Paper Weight: Booklet: 64 - 90 gsm, Bi-Fold: 64 - 105 gsm		
Folding	Z-Fold: Paper size: A3, 11 x 17", B4, Paper Weight: 64 - 90 gsm Tri-Fold: Paper size: A4, Letter (8.5 x 11"), Paper Weight: 64 - 90 gsm		
Interposer	Capacity: 200 sheets Paper Size: Max: A3, 11 x 17" Min: B5 LEF Paper Weight: 64 - 220 gsm		

High Capacity Feeder (Optional)

	ApeosPort-III C7600	ApeosPort-III C6500	ApeosPort-III C5500
Paper Size / Paper Weight	A4 LEF, Letter (8.5 x 11") LEF, B5 LEF, 64 - 176 gsm		
Capacity	2,000 sheets		

Reproduction Prohibitions

Please note that reproduction of the following is prohibited by law: Domestic and overseas bank notes and coins, government-issued securities, national bonds and local bond certificates. Unused postage stamps and post cards. Certificate stamps stipulated by law. The reproduction of works for copyright purposes (literary works, musical works, paintings, engravings, maps, cinematographic works, photographic works, etc.) is prohibited except when they are reproduced personally, at home or within limited range according to the above. This product is equipped with an anti-counterfeit feature. This feature is not intended to prevent illegal reproduction. Be extremely careful about the management of equipment used.

For Your Safe Use

Before using the product, read the Instruction Manual carefully for proper use. Use the product with an appropriate adequate power source and voltage displayed. Be sure to establish a ground. In the case of a failure or short circuit, an electric shock may result.
